PROFILE

Talented Frontend developer with experience working with HTML, CSS, flex, grid, adaptive layout, BEM methodology, JavaScript, working with Git and familiar with Node.js. I am actively looking for a job where I can apply and improve my knowledge of Frontend Development.

I am highly adaptable and quick to learn and thrive in new environments. My analytical and problem-solving abilities and curiosity to learn make me a strong candidate for any position.

Currently, I am refining my skills in Frontend Development. With a passion for new challenges and positive contributions, I'm confident that I can bring value to to any team.

EXPERIENCE

Allihop AB, Sweden

Allihop is the first green business travel platform with direct booking capacity for trains, buses, e-cars, e-scooters and bikes.
2023-now

- Building and maintaining web applications, troubleshooting, working with the development team, keeping track of web development trends.

LLC Business-consult, Rostov-on-don, Russia

A group of major consultancy firms, providing accounting and legal services.
Accountant
2016-2020

- Achieved Cost Savings: I identified and implemented cost reduction measures, resulting in a 20% reduction in operating costs.
- Increased Revenue: I introduced new billing processes, resulting in a 10% increase in revenue.
- Improved Technical Processes: Worked with the lead programmer responsible for the 1C program to make it faster and easier to create reports and tables. Invented new software tools and techniques, which helped to finish our work faster by 40% and make the reporting process more accurate and efficient, resulting in higher-quality company reports.

JSC "Company TransTeleCom", Rostov-on-don, Russia

TTC is one of the largest backbone operators and one of the top five broadband service providers in Russia.
Technical Support Specialist
2013-2016

- Troubleshooting: Successfully diagnosed and resolved technical issues related to internet connectivity, network hardware, and software applications for customers, resulting in a 75% first-call resolution rate.
- Time Management: Managed a high volume of technical support tasks while meeting service level agreements, handling up to 50 tasks per day with a 98% SLA compliance rate.
